

Workshop Sponsored by Middlesex Water Company

Project WET (Water Education for Teachers) is an award-winning, nonprofit water education program and publisher. The program facilitates and promotes awareness, appreciation, knowledge, and stewardship of water resources through the dissemination of classroom-ready teaching aids and the establishment of internationally sponsored Project WET programs.

Project WET Is:

- A publisher of **materials and lesson plans** for teachers and for children.
- A source of leadership training and capacity building **courses, seminars, and workshops** for water education providers.
- A global **water education delivery network** designed to reach children through educators.
- A provider of information, support services, and consultation for people that have questions regarding water education for teachers and children.

Project WET is committed to global water education that is implemented at the community level.

The mission of Project WET is to reach children, parents, educators, and communities of the world with water education.

The goal of Project WET is to facilitate and promote the awareness, appreciation, knowledge, and stewardship of water resources through the development and dissemination of classroom-ready teaching aids and through the establishment of state and internationally sponsored Project WET programs.

Project WET Core Beliefs:

- Water moves through living and nonliving systems and binds them together in a complex web of life.
- Water of sufficient quality and quantity is important for all water users (energy producers, farmers and ranchers, fish and wildlife, manufacturers, recreationists, rural and urban dwellers).
- Sustainable water management is crucial for providing tomorrow's children with social and economic stability in a healthy environment.
- Awareness of, and respect for, water resources can encourage a personal, lifelong commitment of responsibility and positive community participation.

Teaching Educators to Teach Students About Water

Trained facilitators deliver Project WET materials through professional development workshops. At these workshops, participants engage in cooperative, hands-on learning, experiencing the activities as they are presented by skilled facilitators and their peers.

Upon completing the training, participants receive the **Project WET Curriculum and Activity Guide** as well as other water resource education materials, and leave prepared and inspired to teach about water in their classroom or informal educational setting.

Project WET workshops may be thematic, focusing on wetlands, watersheds, conservation, ground water, water quality, or other specific topics.

Middlesex Water Company and Project WET

Middlesex Water Company, headquartered in Iselin, NJ, is pleased to sponsor this FREE Project WET Workshop. Registration is open to the first 20 registrants. For more details, please call (732) 638-7549.
