

Instructions for Boiling Water During a Boil Water Advisory or Recommendation

Heat the water until bubbles come from the bottom of the pot to the top.

Once the water reaches a rolling boil, let it boil for 1 minute.

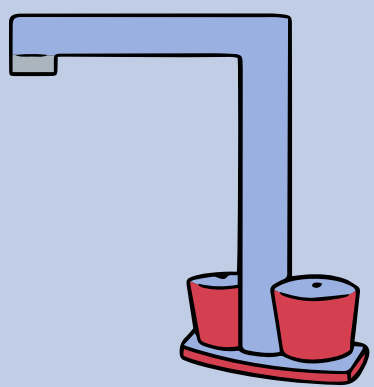

Turn off the heat and let the water cool.

Pour the water into a clean container with a cover for storage.

Residents should boil their water for the following: drinking, cooking or baking, making ice cubes, taking medication, brushing teeth, washing food, mixing baby formula or food, mixing juices or drinks, feeding pets and all other consumption. Water does not have to be boiled for the following activities: showering, washing dishes or clothes.

Instructions Once A Boil Water Advisory or Recommendation is Lifted

Run all cold-water faucets for 3-5 minutes at one time to flush your service connection

Flush automatic ice makers by making three batches of ice and discarding.

Run water softeners/cartridge filters through a regeneration cycle.

Drain and refill hot water heater if temperature is set below 113 degrees Fahrenheit.
